EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Heather Barnes on September 13th, 2006. Claim 15 was identified as "Currently Amended", however no changes were made to the claim. Ms. Barnes specified which limitations were to be added to claim 15 to correct this matter and to place the claim in condition for allowance. Additionally, claims 10 and 22 were amended in order to overcome minor informalities. The application has been amended as follows:

- In claim 10, line 18, after the word 'wherein' insert --a--.
- In claim 10, line 19, before the word 'second' insert --a--.
- Please amend claim 15 as follows:

A method for using an exercise device, comprising the steps of:

providing horizontal support means;

providing a leg bar assembly pivotally mounted to said horizontal support means and being generally moveable between a substantially vertical position and a first range of angular positions;

providing a lift bar assembly pivotally mounted to said horizontal support means and selectively engageable with said leg bar assembly through linkage

means and being generally moveable between a substantially horizontal position and a second range of angular positions;

providing a seat assembly pivotally mounted to said horizontal support means being generally moveable between a substantially horizontal position and a third range of angular positions, said seat assembly including a seat member having a lower surface that is selectively engageable with said lift bar assembly; and,

providing a resistance band extending between said horizontal support means and said lift bar assembly;

providing a securing plate, wherein a first mount means operatively connects said leg bar assembly to said securing plate and a second mounting means operatively connects said lift bar assembly to said securing plate to achieve pivotal movement of said leg bar assembly and said lift bar assembly; and

engaging said lift bar assembly and said leg bar assembly to target specific muscles.

- In claim 22, line 16, after the word 'wherein' insert --a--.

2. The following is an examiner's statement of reasons for allowance:

Applicant has amended claims 1, 10 and 15 to include subject matter that was indicated allowable in the first Office action. Specifically, claim 1 now recites the 'seat assembly including a seat member having a lower surface that is selectively

engageable with a wheel member of the lift bar assembly', which, in combination with the other limitations of the claim, is not taught or made obvious by the prior art.

Additionally, claims 10 and 15 were amended to incorporate the limitations of claim 11, which was objected to as allowable if rewritten in independent form in the first Office action, as this combination is neither taught or made obvious by the prior art.

Accordingly, claim 11 has been cancelled. Claim 21 was allowed in the first Office action, and newly added claim 22 recites the limitation of the securing plate with a first mount means connected to the leg bar for pivotal movement of the leg bar assembly and the lift bar assembly, which, in conjunction with the other limitations recited in the claim, is not taught or made obvious by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allana Lewin whose telephone number is 571-272-5560. The examiner can normally be reached on Monday-Friday, 9AM-5:30PM.
